

Retail Development - Ashford County Square

Client: ING Real Estate

Location: Ashford, Kent

Project Value: £42m

Completed: Spring 2008

The scheme was the extension and refurbishment of the existing shopping centre in central Ashford to provide 500,00 sq ft of retail space.

Construction work included excavation of the existing surface car park. Construction of two level underground car parking area, new three level (ground plus two) retail shell and mall/service areas.

The CDM service included all aspects of design co-ordination and the provision of early access to the anchor tenant of "Debenhams". They then fitted out their own store whilst the remainder of the centre was constructed and other retail fit outs continued.
